Extrathecal chemotherapy in malignant brain tumors. Part II. Chemotherapy with intraventricular or intraluminal administration. Chemotherapy was performed in a group of 38 patients with malignant gliomas (grade II-IV) using cisplatin (CDDP) or methotrexate (MTX) together with systemic chemotherapy. We classified the distribution of central nervous system (CNS) metastases into three categories: 1) the lateral ventricle, 2) the lateral ventricle, third ventricle, thalamus, and third ventricle, thalamus, and basal ganglia, 3) the basal ganglia, thalamus, and midbrain. The total dose of intraventricular chemotherapy in all patients was 60-120 mg and that of intraluminal chemotherapy was 10-30 mg, respectively. The clinical symptoms of CDDP chemotherapeutic reaction were: transient mental disturbance, nausea, vomiting, seizures, and so on. This effect was observed with increased number of metastases, larger cumulative doses of intraventricular chemotherapy, and longer period of intraventricular chemotherapy. Besides, MTX chemotherapeutic effect was manifested as progressive memory impairment, gait disturbance, and dementia. After this chemotherapeutic treatment, the median survival time was significantly prolonged in the patients who underwent intraventricular chemotherapy.Q: Proving the Dini Derivative of $\ln(\sin(x))$ at 0 is 0 . Is it possible to prove the Dini derivative of the function $\ln(\sin(x))$ at 0 is 0 by the definition of D^{∞}_0 . I have trouble starting this question. Any hints would be appreciated. A: Write it as $f(x)=\ln(\sin(x))$ and observe that $f'(x)=\frac{\cos(x)}{\sin(x)}$
